

# **CENTRAL PNEUMATIC®**

## **3/8" AIR ANGLE DRILL**

**Model 2439**

### **ASSEMBLY and OPERATING INSTRUCTIONS**

Due to continuing improvements, actual product may differ slightly from the product described herein.

3491 Mission Oaks Blvd., Camarillo, CA 93011

**For technical questions and replacement parts, please call 1-800-444-3353**

## Specifications

Air Inlet	1/4" - 18 NPT
Maximum Air Pressure	90 PSI
Air Consumption	4.5 SCFM
Chuck Capacity	1/16" - 3/8"
Chuck Type	Jacobs <sup>®</sup> , 3-Jaw Key
Weight	2.26 Lbs.
No Load RPM	1800

## Save This Manual

You will need the manual for the safety warnings and precautions, assembly instructions, operating and maintenance procedures, parts list and diagram. Keep your invoice with this manual. Write the invoice number on the inside of the front cover. Keep the manual and invoice in a safe and dry place for future reference.

## Safety Warnings and Precautions

**WARNING:** When using tool, basic safety precautions should always be followed to reduce the risk of personal injury and damage to equipment.

**Read all instructions before using this tool!**

1. **Keep work area clean.** Cluttered areas invite injuries.
2. **Observe work area conditions.** Do not use machines or power tools in damp or wet locations. Don't expose to rain. Keep work area well lighted. Do not use electrically powered tools in the presence of flammable gases or liquids.
3. **Keep children away.** Children must never be allowed in the work area. Do not let them handle machines, tools, extension cords, or air hoses.
4. **Store idle equipment.** When not in use, tools must be stored in a dry location to inhibit rust. Always lock up tools and keep out of reach of children.
5. **Use the right tool for the job.** Do not attempt to force a small tool or attachment to do the work of a larger industrial tool. There are certain applications for which this tool was designed. It will do the job better and more safely at the rate for which it was intended. Do not modify this tool and do not use this tool for a purpose for which it was not intended .
6. **Dress properly.** Do not wear loose clothing or jewelry as they can be caught in moving parts. Protective, electrically non-conductive clothes and non-skid footwear are recommended when working. Wear restrictive hair covering to contain long hair.
7. **Use eye and ear protection.** Always wear ANSI approved impact safety goggles. Wear a full face shield if you are producing metal filings or wood chips. Wear an ANSI approved dust mask or respirator when working around metal, wood, and chemical dusts and mists.

8. **Do not overreach.** Keep proper footing and balance at all times. Do not reach over or across running machines or air hoses.
9. **Maintain tools with care.** Keep tools clean for better and safer performance. Follow instructions for lubricating and changing accessories. Inspect tool cords and air hoses periodically and, if damaged, have them repaired by an authorized technician. The handles must be kept clean, dry, and free from oil and grease at all times.
10. **Disconnect air supply.** Disconnect air hose when not in use.
11. **Remove adjusting keys and wrenches.** Check that keys and adjusting wrenches are removed from the tool or machine work surface before plugging it in.
12. **Avoid unintentional starting.** Be sure the switch is in the Off position when not in use and before plugging in. Do not carry any tool with your finger on the trigger, whether it is plugged in or not.
13. **Stay alert.** Watch what you are doing, use common sense. Do not operate any tool when you are tired.
14. **Check for damaged parts.** Before using any tool, any part that appears damaged should be carefully checked to determine that it will operate properly and perform its intended function. Check for alignment and binding of moving parts; any broken parts or mounting fixtures; and any other condition that may affect proper operation. Any part that is damaged should be properly repaired or replaced by a qualified technician. Do not use the tool if any switch does not turn On and Off properly.
15. **Guard against electric shock.** Prevent body contact with grounded surfaces such as pipes, radiators, ranges, and refrigerator enclosures.
16. **Replacement parts and accessories.** When servicing, use only identical replacement parts. Use of any other parts will void the warranty. Only use accessories intended for use with this tool. Approved accessories are available from Harbor Freight Tools.
17. **Do not operate tool if under the influence of alcohol or drugs.** Read warning labels on prescriptions to determine if your judgment or reflexes are impaired while taking drugs. If there is any doubt, do not operate the tool.
18. **Use proper size and type extension cord.** If an extension cord is required, it must be of the proper size and type to supply the correct current to the tool without heating up. Otherwise, the extension cord could melt and catch fire, or cause electrical damage to the tool. Check your compressor's manual for the appropriate size cord.
19. **Maintenance.** For your safety, maintenance should be performed regularly by a qualified technician.
20. **Compressed air only.** Never use combustible gases as a power source.

**Note: Performance of the compressor (if powered by line voltage) may vary depending on variations in local line voltage. Extension cord usage may also affect tool performance.**

**Warning:** The warnings, cautions, and instructions discussed in this instruction manual cannot cover all possible conditions and situations that may occur. It must be understood by the operator that common sense and caution are factors which cannot be built into this product, but must be supplied by the operator.

**WARNING:** Some dust created by power sanding, sawing, grinding, drilling, and other construction activities, contain chemicals known [to the State of California] to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:

- Lead from lead-based paints
- Crystalline silica from bricks and cement or other masonry products
- Arsenic and chromium from chemically treated lumber

Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in a well ventilated area, and work with approved safety equipment, such as those dust masks that are specially designed to filter out microscopic particles.

(California Health & Safety Code § 25249.5, *et seq.* )

**Warning!** Operation of equipment in close proximity to a heart pacemaker could cause interference or failure of the pacemaker.

## Unpacking

When unpacking, check to make sure the parts listed on page 6 are included. If any parts are missing or broken, please call Harbor Freight Tools at the number on the cover of this manual as soon as possible

## Operation

Recommended Air Line Components

For best service you should incorporate an oiler, regulator, and inline filter, as shown in the diagram above. Hoses, couplers, oilers, regulators, and filters are all available at Harbor Freight Tools.

1. You will need to prepare a 1/4" air connector (sold separately) to connect to the **Air Inlet (12)** on the Angle Drill. First, wrap the 1/4" air connector (not included) with pipe thread seal tape before connecting to a 3/8" ID Air Source Hose (not included). Connect the Air Source Hose to the Angle Drill.

**Note:** If you are not using an automatic oiler system, before operation, add a few drops of Pneumatic Tool Oil to the airline connection. Add a few drops more after each hour of continual use.

2. Set the air pressure on your compressor to 90 PSI. Do not exceed the maximum air pressure of 90 PSI.

3. Check the air connection for leaks.

## Operation

**Note:** This drill can be used to get into hard to reach places with its angular configuration. It may also be used just like a traditional drill. This drill does not have a reverse drive.

**Warning!** Always disconnect the unit from the air compressor when changing bits.

**Warning!** After drilling or driving screws, the bit will be extremely hot. Do not touch it until it has had ample time to cool down.

1. Insert the **Chuck Key (44)** into one of the holes in the **Collet (41)** and turn it counterclockwise to open the jaws.
2. Insert the bit and hand tighten it, then tighten it with the **Chuck Key (44)** by turning it clockwise.
3. With heavy leather gloves on, tug on the bit and make sure it is securely attached. Check that it is straight.

**Note:** Always use sharp bits. Dull or damaged bits may cause undue stress on the drill and possibly break causing injury. Bits are available at Harbor Freight Tools.

4. Securely clamp your workpiece.

### Drilling

5. When drilling wood, place the bit at the point to be drilled. If you are drilling a hard, smooth surface, use a punch to mark the drill location. Grasp the drill firmly with both hands and slowly squeeze the **Trigger (3)**. Never force the tool. Only apply light pressure when horizontal drilling.

**Note:** For fine tune air adjustment, slowly turn the **Nut (9)** until you achieve the desired air flow.

**Note:** When drilling plastics or plastic coated chip board, follow the same directions as stated in number 5 for wood.

**Note:** If a bit becomes wedged into the workpiece, remove it from the drill and use the appropriate hand tools to remove it.

6. When drilling metal, always use a punch to mark the drilling position. Use a lubricant with most metals, to prolong the life of the bit and increase the drilling action. With steel, tin, and sheet metal use a light machine oil, with aluminum, use paraffin. Do not use lubricants with brass, copper, and cast iron. Grasp the drill firmly with both hands and slowly squeeze the **Trigger (3)**. Never force the tool. Only apply light pressure when horizontal drilling.

7. When driving screws, use bits suitable for the type and size of screw you are using. Drill a pilot hole for the screw head to bite into. Use the lowest torque setting. Grasp the drill firmly with both hands and slowly squeeze the **Trigger (3)**. Never force the tool. To back out a screw, use the appropriate hand tools.

## Maintenance

Disconnect the drill from the air compressor while performing maintenance.

1. Clean the unit with a damp cloth. Never use solvents to clean the unit.
2. Inspect the chuck and remove any dirt or debris.
3. Periodically oil the hinge on the **Trigger (3)**.
4. Use a grease gun (not included) to add grease to lubricate the Bevel Gear (30) and Bevel Gear (34) through the Grease Cap (43).

## Parts List

Part No.	Description	Qty.	Part No.	Description	Qty.
1	Housing	1	26	Gear	1
2	Valve Bushing	1	27	Pin	2
3	Trigger	1	28	Hex Nut	1
4	Pin	1	29	Bushing	1
5	O-Ring	1	30	Bevel Gear	1
6	Valve Stem	2	31	Angle Head	1
7	Spring	1	32	Bearing	1
8	O-Ring	2	33	Work Spindle	1
9	Nut	1	34	Bevel Gear	1
10	Muffler Cover	1	35	Screw	1
11	Retaining Ring	1	36	Bearing	1
12	Air Inlet	1	37	Bushing	1
13	Bearing	1	38	Washer	1
14	End Plate	1	39	C-Ring	1
15	Rotor	1	40	Washer	1
16	Rotor Blade	4	41	Collet	1
17	Pin	2	42	Collet Screw	1
18	Cylinder	1	43	Grease Cap	1
19	Front Plate	1	44	Chuck Key	1
20	Bearing	2			
21	Steel Ball	1			
22	Washer	1			
23	Gear Ring	1			
24	Bearing	2			
25	Gear Seat	1			

### PLEASE READ THE FOLLOWING CAREFULLY

THE MANUFACTURER AND/OR DISTRIBUTOR HAS PROVIDED THE PARTS DIAGRAM IN THIS MANUAL AS A REFERENCE TOOL ONLY. NEITHER THE MANUFACTURER NOR DISTRIBUTOR MAKES ANY REPRESENTATION OR WARRANTY OF ANY KIND TO THE BUYER THAT HE OR SHE IS QUALIFIED TO MAKE ANY REPAIRS TO THE PRODUCT OR THAT HE OR SHE IS QUALIFIED TO REPLACE ANY PARTS OF THE PRODUCT. IN FACT, THE MANUFACTURER AND/OR DISTRIBUTOR EXPRESSLY STATES THAT ALL REPAIRS AND PARTS REPLACEMENTS SHOULD BE UNDERTAKEN BY CERTIFIED AND LICENSED TECHNICIANS AND NOT BY THE BUYER. THE BUYER ASSUMES ALL RISK AND LIABILITY ARISING OUT OF HIS OR HER REPAIRS TO THE ORIGINAL PRODUCT OR REPLACEMENT PARTS THERETO, OR ARISING OUT OF HIS OR HER INSTALLATION OF REPLACEMENT PARTS THERETO.

**NOTE:** Some parts are listed and shown for illustration purposes only and are not available individually as replacement parts.
